A motivated developer with a certification in UX/UI design, a B.S. in psychology, a career studies certificate in web design and development, and ongoing pursuits of an associate's degree in computer science. I am skilled in HTML, CSS, JavaScript, and responsive design, bringing a user-centric approach to web development. With a background in psychology, I excel at creating intuitive and visually appealing websites. Eager to contribute my technical skills and creative problem-solving to dynamic development teams, I am dedicated to continuous learning and enthusiastic about making a meaningful impact in design and development.

Education

- **Northern Virginia Community College**
 - Web Design & Development, C.S.C. 2023-2024

Projects

Word of Kako Photography Site - <https://dev-world-of-kako.pantheonsite.io/>

- Built a WordPress photography site, World of Kako, exhibiting travel photos, sharing tips and equipment evaluations for photographers. Conducted a UX research case study to optimize the site's design and user experience.

Blackjack with JavaScript - <https://jacosta.studentdev.site/module1/portfolio/blackjack.html>

- Immerse yourself in a classic Blackjack experience built with JavaScript. Draw cards, calculate scores, and strategize your way to victory. This project showcases dynamic DOM manipulation, problem-solving, and algorithmic logic skills.

Dynamic JavaScript Showcases - <https://jacosta.studentdev.site/module1/link02/index.html>

- Home page for my JavaScript projects for the various interactive web applications I have built, including a ride restriction tool that helps theme park visitors determine which attraction they can safely enjoy based on entered height and weight specifications.

Marian House Redesign - <https://jacosta.studentdev.site/module1/portfolio/marian-house.html>

- Redesign aimed at address visitors' concerns about data breaches during the donation process, creating a more secure and reassuring environment for potential donors.

Experience

● **Account Coordinator** - Alera Group, Inc.

2020 - Present

- Collaborated with Account Managers to assist in the management and support of various clients, both small and large scale in a fast paced environment.
- Maintained relationships with over 80+ clients through regular follow-ups, gathering feedback that informed enhancements to improve portal usability and functionality.
- Conducted in-depth research to present intranet development plans and solutions tailored for the requirements of our clients.
- Communicated innovative complex technical information effectively to various teams, fostering project alignment.

● **HR Specialist** - Lunarline, Inc.

2017 - 2020

- Demonstrated ability to collaborate with diverse stakeholders, effectively engaging in cross-functional teams to attain project milestones in web development.
- Facilitated meetings with CEO and executive leaders to establish and monitor performance metrics for HR processes, highlighting robust communication and leadership skills applicable to project management.
- Participated in the redesign project of Lunarline's logo, collaborating closely with the marketing department to ensure seamless integration of the new visual identity into the company's online presence.
- Designed and executed Lunarline's monthly newsletter, optimizing content and layout based on KPIs for widespread internal distribution.
